

How to Create PBNs to Make Money While Getting Stronger for the ultimate SEO Boost?

By Fernando Raymond Founder & CEO - ClickDo™ & SeekaHost™

### What you need to build powerful Private Blog Networks?

> Good Expired domains with solid backlinks from super sites.

> PBN Hosting with multiple IP addresses to host each domain.

> At least 20 well written 1000 plus word articles to get started (How to and list posts. \*\*List posts rank best in my experience, but choose the topics according to the keywords you want to rank.)

> Build the PBN sites with a WordPress theme to start with. Once they rank and get more traffic, get them custom built for better branding and UX (you may also need more powerful PBN hosting then).

> Create important pages to rank and get inquiries once indexed on search engines.

# What do most people use their PBNs for?

Most people use PBNs to just to link to their money sites or sell some links.

You can do better than that! Build the PBNs in a way to become money machines for you. Each of your PBN sites should generate money for you with a content publishing services business model applied.

What is the content publishing business model (Guest posting Services) & how to do it with your PBN sites?

#### Publishing other people's content for a fee.

Like all big websites on the web that do news and media publications, your PBNs can be tailored to publish content for clients.

#### After all that's what the PBNs are for right?

So why not build your PBNs in a manner to attract tons of inquires from people who are looking to publish their content on relevant websites!

### How to build your Private Blog sites to make money from offering guest posting services?

- There are a few things to keep in mind and most importantly the PBN site must be built on a powerful domain with solid backlinks.
- It should also be hosted with multiple IP PBN hosting from <u>www.seekahost.app</u> to avoid footprints, get fast web hosting from different server locations and scale your network.
- Publish at least 20 to 30 plus high-quality articles covering relevant topics in the niche you want to rank this site in.
- Articles should be mainly list posts as they rank super fast for several keywords covered. Go for easy to rank terms with a lower keyword difficulty, that you can find with a keyword research or SEO tool.
- Add contact us and write for us pages that bring in inquires.
- Create social media profiles for each domain and make them look like brands with unique logos. Run some Facebook ads to create awareness.
- Build high-quality backlinks to your PBNs to make them more powerful and continuously grow their authority on the web. Ideally, there should be a constant flow of content being published on the site and on other sites with backlinks to it.

# What pages to create on your PBNs?

- 1. Write for us
- 2. Write for us business
- 3. Submit a guest post
- 4. Business write for us
- 5. Post guest posts
- 6. Guest posting site
- 7. Contact us and of course all the pages that a legit website would have, including policies.
